

Regulation Overview

- South Australian United Church Netball Association (SAUCNA) is committed to member wellbeing and safety.
- The aim of this policy is to provide guiding principles and general advice on the management of concussion in netball to Clubs and Teams at SAUCNA.
- The policy sets out key steps to ensure those involved in netball at SAUCNA are able to reduce the risk of long-term damage due to concussion, by:
 1. Education – how to recognise and manage concussion
 2. Information – about any previous concussions
 3. Designation – the appointment of a person responsible for ensuring concussion policies are implemented within each SAUCNA club.
- The policy is general in nature, and individual treatment will depend on the particular circumstances of each individual case.
- SAUCNA will review this policy regularly and modify the policy according to new information/advice.

Education

What is concussion?

- Concussion is a brain injury that affects brain function.
- Concussion is caused by direct or indirect force to the head or body. Concussion can occur from even a minor knock.
- Concussion is serious and should be treated accordingly.
- The effect of concussion can vary from person to person. Symptoms may be apparent immediately or may develop over time.
- Usually, the disturbance in brain function is temporary, and most affected people fully recover.

How do we recognise concussion?

- Following an incident capable of causing concussion in a game or practice, suspected cases of concussion should be assessed using an approved recognition tool (see resources section):

“RECOGNISE, REMOVE, REFER”

- **Suspected cases must be immediately assessed.**
 - **A person on the ground must first be assessed as safe to move off the court.**
 - **Games/training should not continue with a potentially affected player on court.**
- Assessment using this tool is **not** a replacement to seeking a comprehensive medical assessment.

South Australian United Church Netball Association Inc. Regulation Document Concussion

- Any indication of the presence of “RED FLAG SYMPTOMS” as defined by the assessment tool, must be responded to as requiring immediate medical attention, including calling emergency medical services.
- Absence of symptoms listed on the concussion assessment tool is not a guarantee that concussion has not occurred.

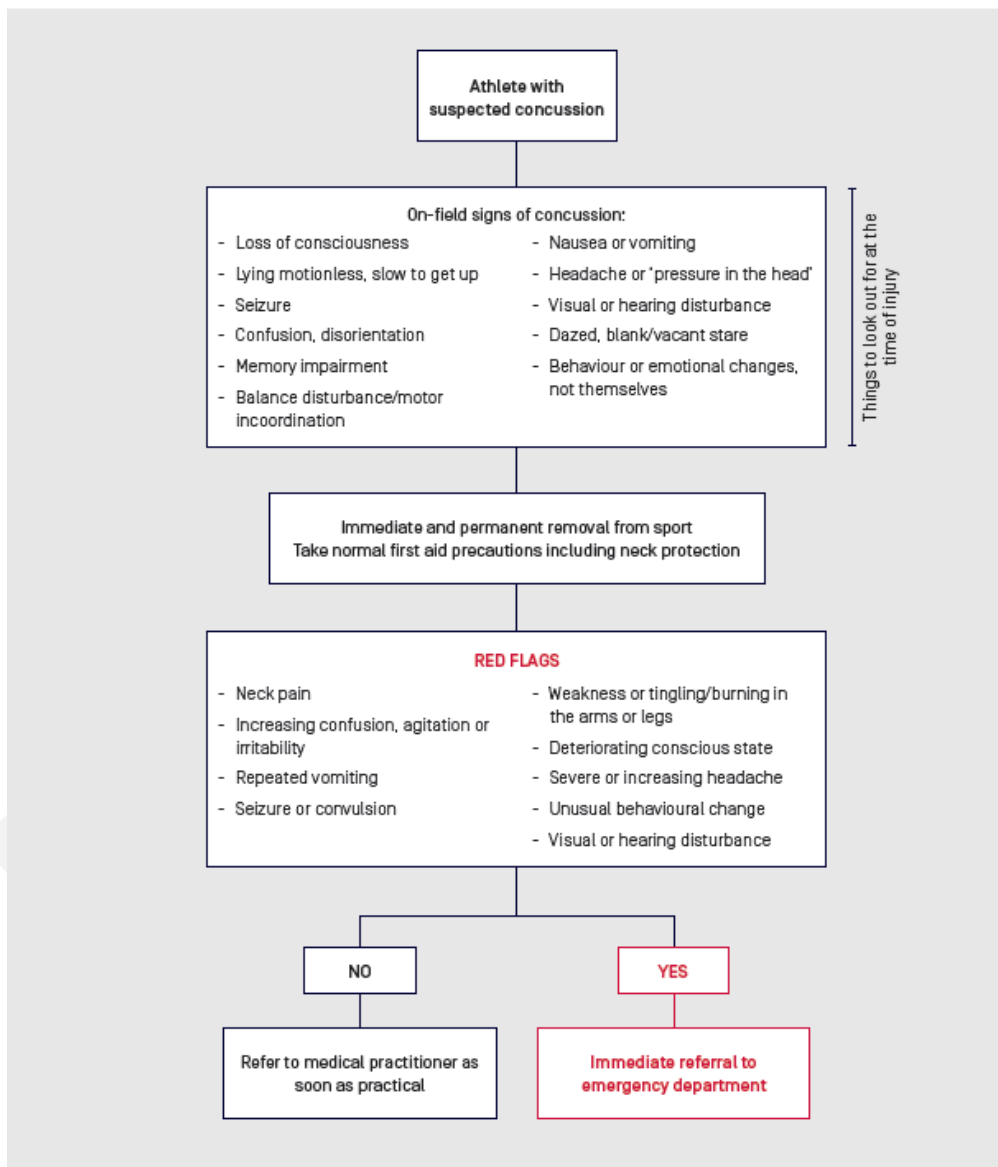

IF IN DOUBT, SIT THEM OUT!

- Continue to monitor the person for developing symptoms.
- **Only a trained medical practitioner can make a diagnosis of concussion.**

Regulation Document

Concussion

How do we manage a member following a concussion?

- A concussed person is in a vulnerable state.
 - Stay with them at all times.
 - Don't let them drive a vehicle.
 - Refrain from consuming alcohol, and certain medications put the person at additional risk – medication should be checked with their doctor.
- Rest is necessary for the brain to recover, and this may mean time off school or work. Children may require longer periods of rest to recover – more conservative approaches are taken with children.
- Return to active sport (where further collisions are possible) should only occur with appropriate medical clearance. Current guidelines for children are 14 days:
[https://www.concussioninsport.gov.au/data/assets/pdf_file/0009/683649/Return to Sport Protocol - children 18 years of age and under.pdf](https://www.concussioninsport.gov.au/data/assets/pdf_file/0009/683649/Return_to_Sport_Protocol_-_children_18_years_of_age_and_under.pdf)

Information

- Knowledge about previous concussions can help identify members who are in a higher risk category.
- Clubs should encourage members to report any history of concussion.
- Such information, as with all personal information, is to be treated with full confidentiality.

On-court Process

- Assess immediately.
- If safe to move the player, do so as soon as possible. Umpires should hold time to ensure this is completed in a safe manner.
- If unsafe to move the player (or unsure), do not move and wait for trained medical personnel.
 - Umpires should stop the match and call umpire time.
 - If there is a spare court at the venue the match should be moved, and someone should stay with the injured player.
 - If there are no spare courts at the venue the match will be abandoned in accordance with SAUCNA Playing Conditions.

Designation – appointing a Club Concussion Coordinator

- Clubs and Teams should take a proactive role in educating all members on the recognition and management of concussion.
- SAUCNA Association Courts are staffed with trained First Aid Professionals capable of assessing concussion cases and assisting with obtaining emergency medical attention when required. **At the association courts clubs should seek the assistance of the first aid personnel, located in the First Aid Room, to assess suspected concussions.**
- Clubs should appoint a Concussion Coordinator for Suburban court matches, with a specific role of ensuring that concussion protocols are communicated and followed.
- In small clubs this can be the coach, team manager, primary caregiver, or a parent willing to take on the task.
- They will be authorised to make decisions and be proactive in educating members on the subject of concussion. To do this they should keep their knowledge up to date and advise the club on any recommended changes to protocols.

South Australian United Church Netball Association Inc. Regulation Document Concussion

Clubs should employ the following checklists to assist them in establishing their own club-based protocols:

Club Concussion Checklist Pre-Season Preparation and Education 2017

Club Name:

Club Concussion Coordinator(s) and Contact Number:

To reduce the risk of concussion the following pre-season preparation and education has been implemented:

Concussion Fact Sheets have been:

- posted on the club website or at the club
- distributed with registration information
- emailed to all parents, coaches and officials

Concussion Recognition Tool 5 has been:

- provided to all coaches, officials and designated individuals
- included in all first aid kits

Concussion Information Posters have been:

- posted on the club website
- distributed with registration information
- emailed to all parents, coaches and officials

In-person concussion education has been delivered to:

- all coaches
- players
- parents

Concussion recognition and management training has been provided to:

- the concussion co-ordinator
- all first aid providers and sports trainers
- interested coaches and parents

- A Medical Emergency Plan has been developed and communicated to all coaches, officials and designated individuals.**

DR

Club Concussion Checklist Practice and Game Day Management 2017

Club Name:

Club Concussion Coordinator(s) and Contact Number:

The following procedure should be followed for recognising and managing concussion at practice and on game day:

- Identify one or more people who are responsible for coordinating all concussion-related activity
- Ensure at least one person has a fully charged mobile phone and the phone number for emergency services (000)
- Ensure all coaches, officials and first aid providers have access to a Concussion Recognition Tool 5
- Ensure an ambulance is called immediately if any "Red Flags" are raised.
- Ensure all players who are suspected of having a concussion are:
 - Removed from participation immediately
 - Assessed by someone experience and trained in using the Concussion Recognition Tool 5
 - Not allowed to return to participation on the same day
 - Supervised and monitored for at least 2 hours following a suspected concussion
 - Provided with appropriate information about how to manage a concussion including return-to-play protocols
 - Provided with the contact details of a local medical practitioner with experience in managing concussion
 - Contacted within 48 hours to check they are okay and have all the information they need.
